

## MaxSea International is hiring

### Job Position: Development Engineer

#### Our company

MaxSea International, the European leader in marine navigation software and maritime cartography, located in the French Basque Country (Bidart), is looking for development engineers and software architects M / F

Our company operates in an environment oriented towards creativity, innovation and development of the latest technologies.

These values are organized around the SCRUM method (a variation of the AGILE development method).

#### Job Description

Under the team leader responsibility, you will take responsibility for the development as well as the functions integrated in our MaxSea TimeZero product. Qualified applicants will have:

- A high tech mind and a taste for innovation; you must be inherently adaptable and enjoy working in teams.
- Experience in ASP.net and JQUERY.
- Fluency in C # (ideally in versions 3.5 and 4.0) and Visual Studio.
- Familiarity with SQL Server database and/or Geographical Information Systems is much appreciated.

#### PROFILE

- Degree from a general engineering technical (computer) school.
  - 1 to 5 years of development experience.
  - Good technical knowledge of English.
- \*Position opened to disabled workers.

To apply, send a cover letter, CV and salary requirements.

Salary: according to experience
